

ChatApp

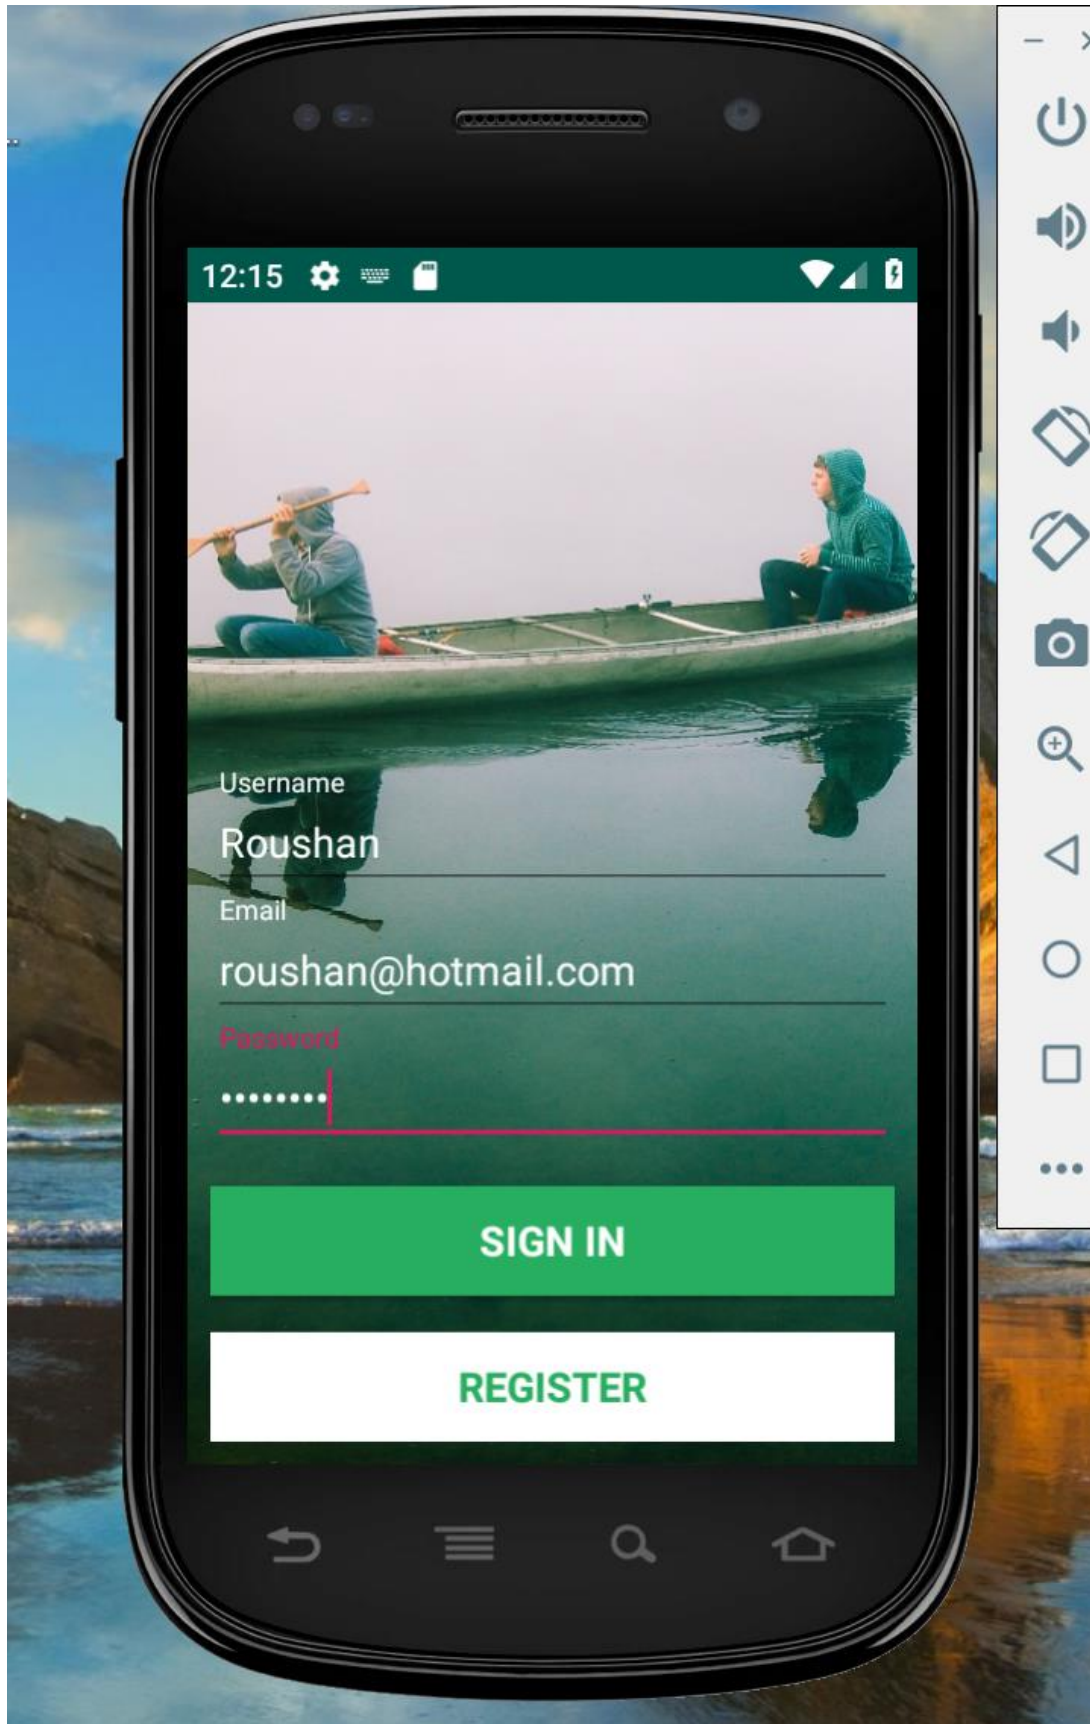

ChatApp uses Firebase authentication and real time database to implement a chat app. It allows for the new users to register for the first time and the users with an account to sign in and join the chat.

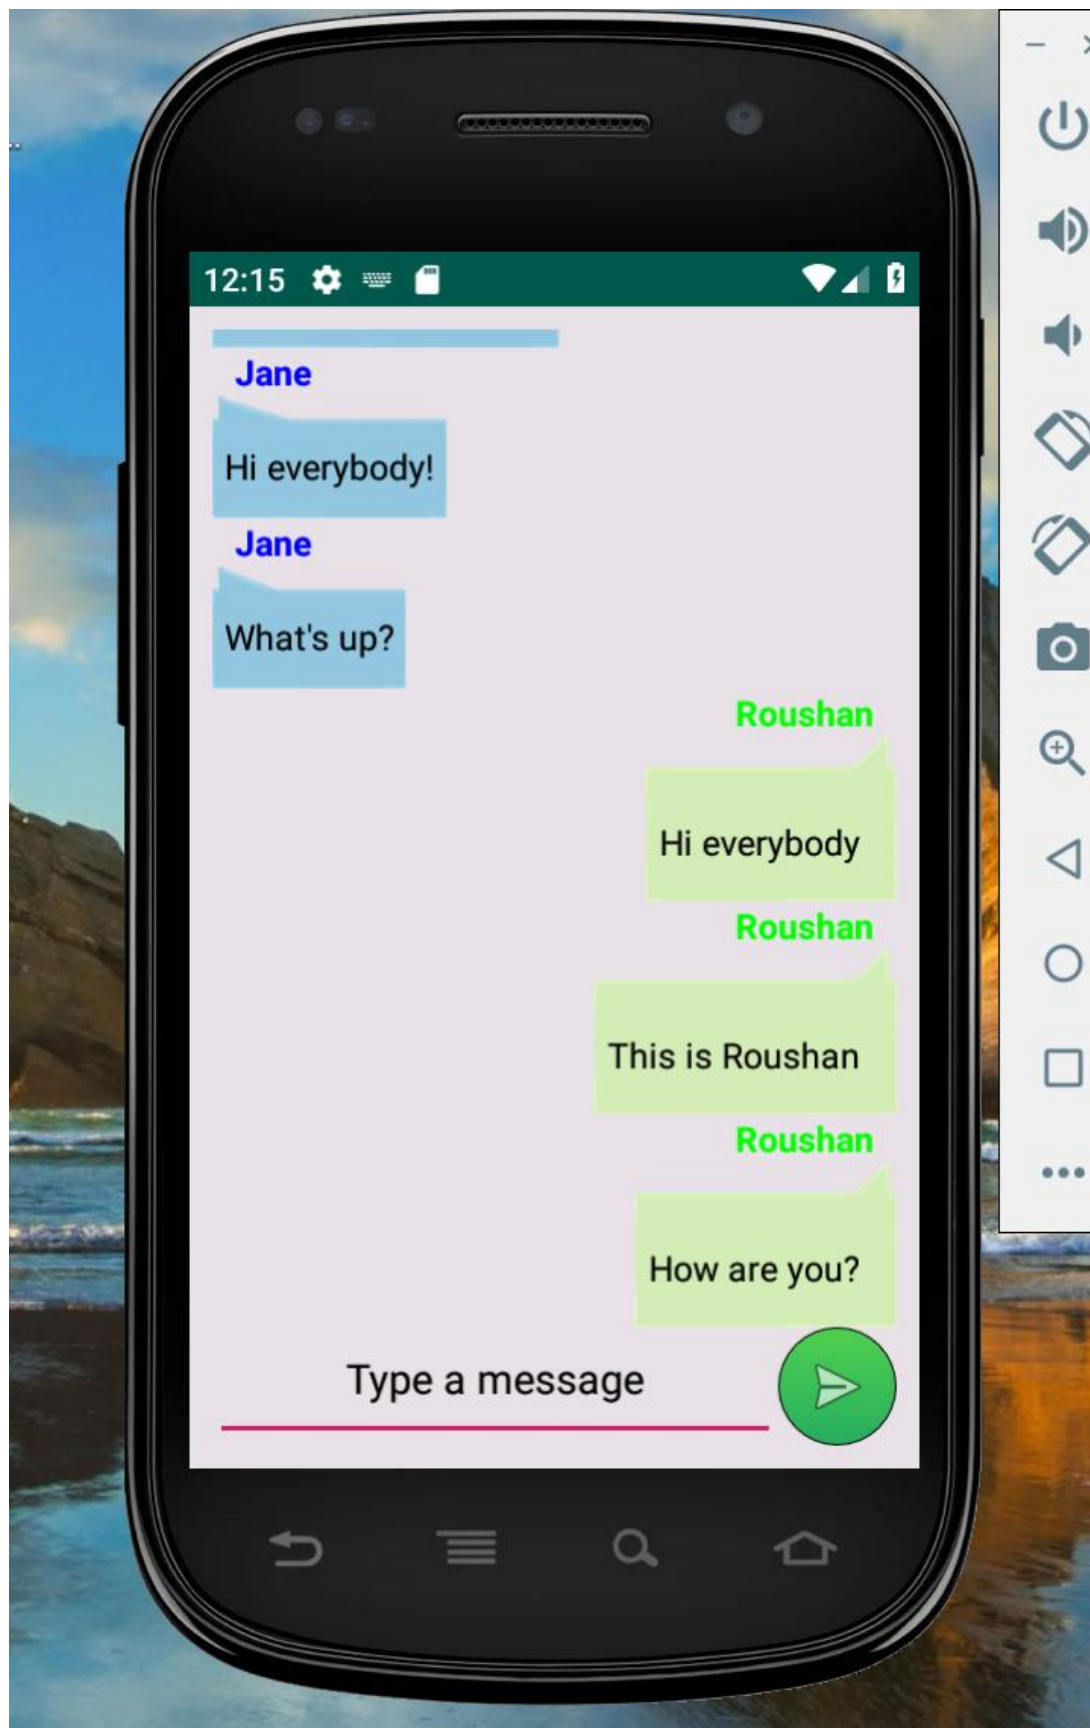

The following screen captures show 3 users at the chat room talking:

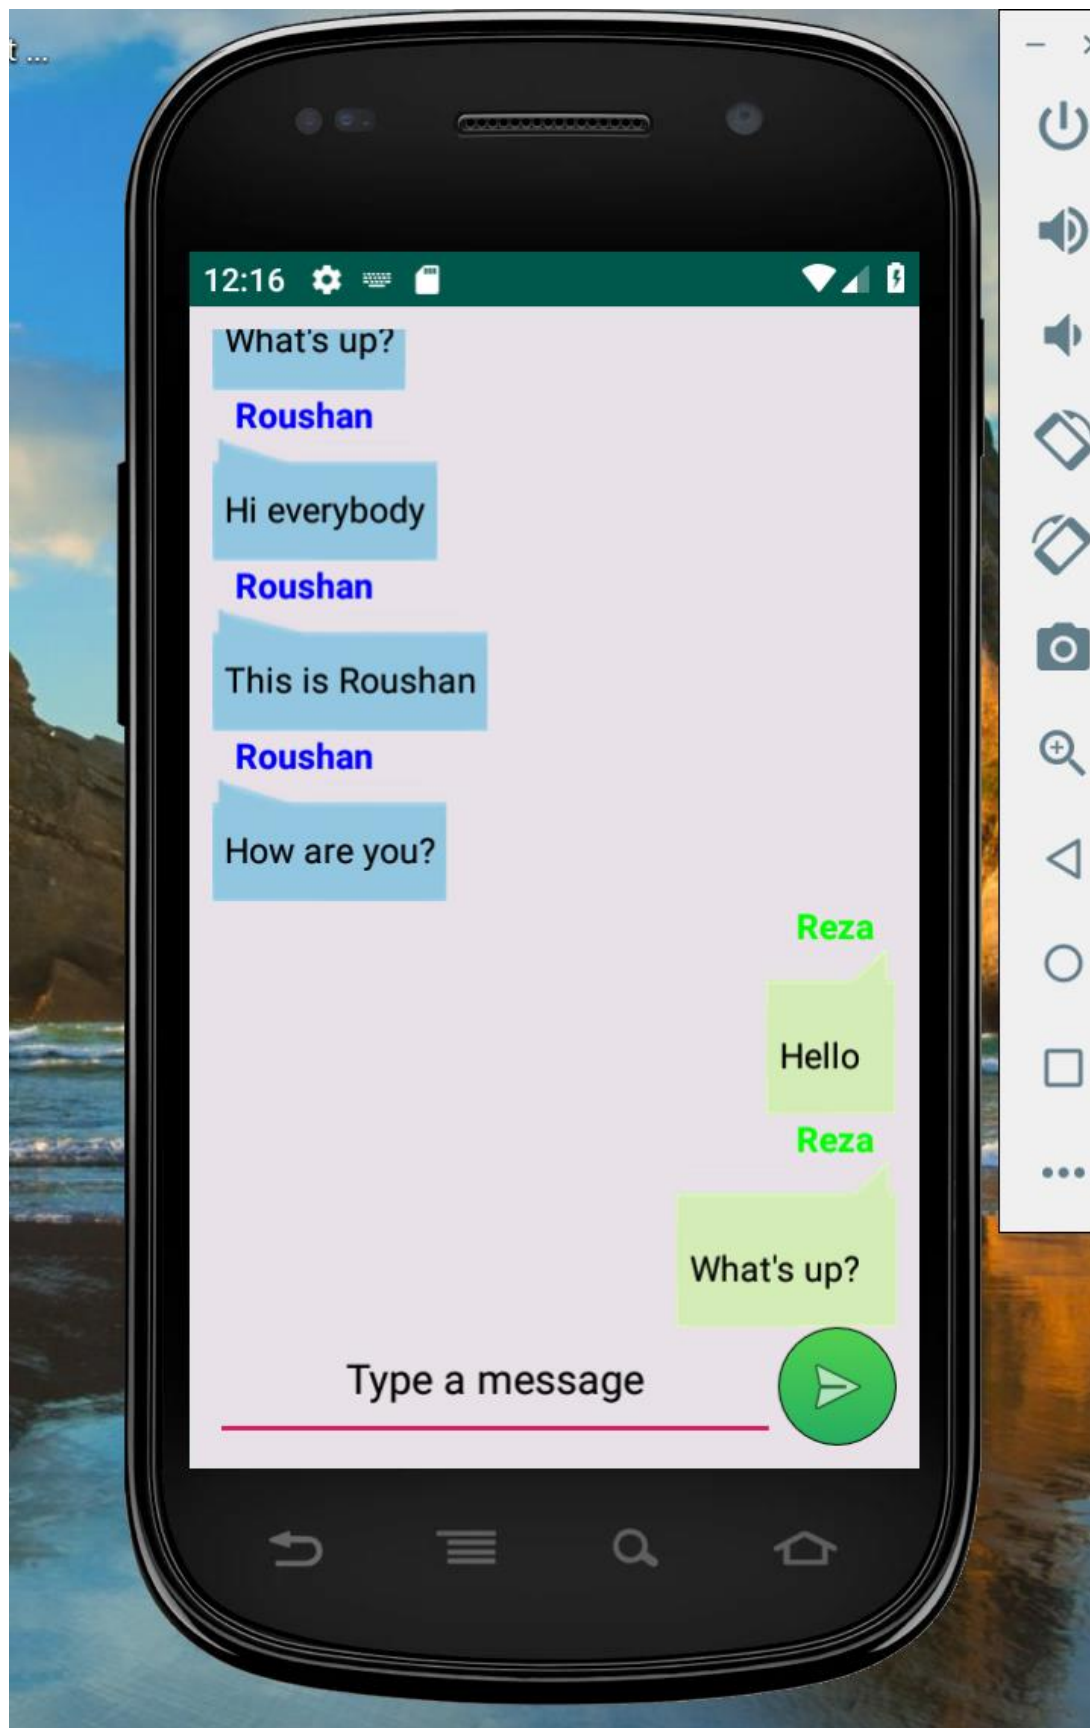

12:16

What's up?

Roushan

Hi everybody

Roushan

This is Roushan

Roushan

How are you?

Reza

Hello

Reza

What's up?
